

Computer Illustration Project Brief

Project 5: Fictional Scene Due: Week 15

Objective

Choose one of the four short stories supplied and illustrate a scene around the descriptive text. Pay close attention to the details found within the story including, but not limited to characters, settings, lighting, colours, etc. These will all aid in illustrating your take on the stories.

Keep in mind what we have covered in this course so far; simplification, style, exaggeration and layering.

Outcome

Print-outs should be in colour and sized at 8.5" x 11" on cardstock. Orientation is up to you.
