

## Computer Illustration Project Brief

### Project 2: People Due:

#### Objective

Using research, develop an illustration style based on your interest and what you gravitate to. Pay very close attention how these illustrators approached the human figure, particularly how they stylised and exaggerated certain aspects of the person to amplify personality or character traits. Find multiple examples whether they be historical or regional of your style of choice.

Practice your style with the provided image then use the skills learned to stylise the portrait you were assigned. Pay close attention to the person photographed and attempt to use your style to illustrate their personality.

#### Outcome

Present a print-out of each assignment on their respected due dates.

Print-outs should be in colour and sized at 8.5inches by 11inches or A4.

The second part of the project **must** include colour used and **must** be printed on card stock paper.
