

## **Introduction to Photography Project Brief**

### **Project 02: Natural Lighting Due:**

#### **Objective**

**Part 01:** Using the distinct qualities of the light during the day, take photographs that use light and shadow as a character in association with your subject.

**Part 02:** Take 3 images of the same location using the same composition at 3 radically different times of the day.

For both parts of this project, be sure use composition grids and elements as well as note the technical aspects of the camera. Take notes about each photograph and location which will aid in your presentation.

*Photographs taken on school property or the National Park will not be accepted.*

#### **Outcome**

Create a powerpoint presentation with four images for part 01 of the assignment and three photographs for part 02 for the due date of this assignment.
