

Portrait Photography Project Brief

Project 4: Start to Finish Due: 10th December

Objective

Using all of the techniques learned in this class, stage a photoshoot or multiple photoshoots of your choice. You are responsible for securing a model and locations. Special attention should be placed on poses.

There does not need to be a larger theme or concept for your photographs nor do they need to be a part of a series.

Energy and attention should be placed on technique, both before and after the camera.

Outcome

Create a Power-Point slide show of 5 images. When creating your presentation, place the untouched image next to the fully processed image to show the level of processing.

In addition, be sure to speak about composition and the use of the grids and other compositional elements as well as the technical aspects of the camera and how they enhance your image.
